

Cardify

Cardify is a sleek flashcard application built with [Next.js](#), designed to simplify studying with a beautiful, user-friendly interface. Create and manage flashcards effortlessly while we continue to enhance the backend. Currently in active development, Cardify focuses on delivering an intuitive UI for learners.

Made By

- **Ashfin:** [GitHub](#)
- **Himel:** [GitHub](#)
- **Mehreen:** [GitHub](#)

Features

- **Create Flashcards:** Add new flashcards with questions and answers through a polished, intuitive interface.
- **Delete Flashcards:** Remove flashcards you no longer need with a single click.
- **Stunning UI:** Enjoy a modern, responsive design that makes studying a pleasure.

Note: Cardify is in the development stage, with backend improvements in progress to enhance functionality.

Installation

Get started with Cardify in a few simple steps:

1. Clone the Repository

```
git clone https://github.com/your-username/cardify.git
```

2. Navigate to the Project Directory

```
cd cardify
```

3. Install Dependencies

```
npm install
```

4. Run the Development Server

```
npm run dev
```

5. Open your browser and visit <http://localhost:3000> to experience Cardify's elegant interface.

Usage

- **Add a Flashcard:** Enter a question and answer in the input fields, then click "Add Card" to create a new flashcard.
- **Delete a Flashcard:** Click the "Remove Card" button on any flashcard to delete it.

- **Enjoy the UI:** Navigate through your flashcards with a smooth, visually appealing experience.

Contributing

We'd love your help to make Cardify even better! To contribute:

1. Fork the repository.
2. Create a new branch (`git checkout -b feature/your-feature`).
3. Commit your changes (`git commit -m 'Add your feature'`).
4. Push to the branch (`git push origin feature/your-feature`).
5. Open a pull request.

Please open an issue to discuss bugs, UI suggestions, or backend improvements.
